Professional Experience

Team Lead FE Developer, EPAM Systems

02/2021 – present
Kyiv, Ukraine

4 years of work on a large and swiftly expanding e-commerce with a complex structure and advanced technologies, an international team from different European countries.

Tech stack: React, Next.js, TypeScript, Node.js, Jest, React Testing Library, GraphQL, Bloomreach, Storybook, Jenkins, Sonar.

Project role:

- Delivering complex features: development, test coverage, demo sessions, and release coordination involving several teams;
- Implementing improvements, PoCs, and working on tech debt;
- Experience in leading the team, namely holding daily meetings, retrospectives, refinements, onboarding/mentoring team members, code review, assistance with technical solutions, clarifying requirements and coordinating weekly releases, also interviewing new developers internally, and for separate projects.

Education

Bachelor in Metrology and informational and measuring technologies, National Technical University of Ukraine «Igor Sikorsky Kyiv Polytechnic Institute»

2012 – 2016
Kyiv, Ukraine
